TIPS & TECHNIQUES

UNCLOGGING SHOWERHEADS

If your showerhead is getting clogged with mineral deposits, don't purchase a new shower head just yet. Instead, put enough vinegar in a saucepan to cover the shower head. Heat the vinegar to just below boiling and turn off the heat. Place the shower head in the pot and let it soak for around eight hours. The acid in the vinegar will eat away at the mineral deposits. Rinse the shower head and it's ready to use.

SANDPAPER STORAGE

Whenever you get an overnight letter delivery, save the envelope. These envelopes are great for storing sheets of sandpaper. They protect the paper and keep it flat. In addition, you can stick a sheet of sandpaper in the clear plastic pocket to immediately identify the grit of the sandpaper!
